Near**ATM**

The idea of this project is to create web application that can easily show you ATMs near you anywhere in Gent.

City of Gent is our client and they want to invest in our application for all devices. They provide us informations about location of ATMs and they gave us a deadline until end of July.

Our customers are bank users who uses electronic devices for money transfer.

With our web application they can check where is ATM near them, and where they can widraw money without paying fee.

This app uses Google Maps, GPS location and datasets

DATASETS

NearATM application is made by Andro Račić as assignment on Arteveldehogeschool, for course New Media Desing and Development I Academic year 2016-2017.
